

Rafael de Lima Souza

Front-End Developer

São Paulo, SP, Brazil | +55 (11) 99388-9196 | rafinha-lima1@live.com

Professional Summary

Front-End Developer with experience working on a production HR SaaS platform using Angular and building websites and automations with Next.js, TypeScript, and Python. Experienced in developing responsive interfaces, reusable components, and REST API integrations. Independent projects focused on security and infrastructure on Solana.

Technical Skills

Front-End: Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, responsive design, and REST APIs.

Back-End & Data: Java, Spring Boot, Python, JPA/Hibernate, PostgreSQL, MySQL, MongoDB, and Redis.

Cloud & Development: AWS (S3, Lambda, API Gateway, EC2, RDS, and CloudFormation), Docker, Git, GitHub, Maven, and Vercel.

Tools & Practices: Postman, Figma, Jira, Scrum, Kanban, UX/UI, and technical documentation.

Professional Experience

JET LATAM

Community Operations Associate

Feb 2026 - Aug 2026 | Remote

- Developed and maintained a multilingual website using Next.js and TypeScript, covering company information, events, onboarding, forms, and lead capture.
- Built the JET Traders integration between the website and Telegram, including registration, identity verification, administrative review, approval, and automated invitations.
- Developed bots and automations in Python and TypeScript for content evaluation, rankings, market data commands, monitoring, and operational support.
- Set up and managed Discord and Telegram communities, including roles, permissions, multilingual channels, and access workflows.
- Coordinated campaigns, bounties, events, and the JETStars program with creators, builders, and partners across Brazil and Latin America.

A5 Solutions

Junior Front-End Developer

Aug 2025 - May 2026 | São Paulo, SP, Brazil

- Developed and maintained interfaces for a production HR SaaS platform using Angular, TypeScript, HTML, and CSS.
- Created reusable components, responsive screens, and navigation flows integrated with REST APIs.
- Implemented validation, access controls, and protected routes across application modules.
- Supported integrations with AWS API Gateway, Lambda, and S3, and contributed to bug fixes and sprint deliveries.

A5 Solutions

Front-End Development Intern

Nov 2024 - Jul 2025 | São Paulo, SP, Brazil

- Developed pages and components in Angular, TypeScript, HTML, and CSS for the HR SaaS platform.
- Applied responsive design and visual standards while helping maintain the modular front-end architecture.

Professional Experience (continued)

A5 Solutions

AWS Business Intern

Mar 2024 - Nov 2024 | São Paulo, SP, Brazil

- Tracked AWS partnership opportunities and projects through AWS Partner Central.
- Organized records, CEI and POC requests, and documentation for business and technical processes.
- Served as a point of contact between internal teams and AWS to follow up on requests and deadlines.

Vivo (Telefônica Brasil)

Project Management Intern

Aug 2023 - Mar 2024 | São Paulo, SP, Brazil

- Created an Excel template to standardize and streamline project budgeting.
- Helped create user stories and epics in Jira and organize the work breakdown structure (WBS) to track deliverables.
- Kept documentation and tracking records up to date to support team management and communication.

Projects & Achievements

AEGIS

Privacy layer for multisig wallets on Solana, featuring private payments, payroll, invoices, and scoped audit links. Placed 3rd in the Cloak Track at the Frontier Hackathon / Superteam Earn.

<https://aegisz.xyz/> | <https://github.com/lrafasouza/Aegis>

Sign-Safe

Tool that analyzes signing requests and classifies transactions as SIGN, HOLD, or REJECT. Supports legacy and v0 transactions, Token-2022, durable nonces, Squads v4, and DeFi protocols. Ranked in the top 7 out of 329 projects.

Pegana

Risk oracle for 68 pegged assets on Solana, including stablecoins, liquid staking tokens (LSTs), and yield-bearing assets. Provides risk status updates through a dashboard, REST API, WebSocket, TypeScript SDK, MCP, and alert channels.
